

ERWAN ANDRÉ

AI PROJECT MANAGER · FORWARD DEPLOYED ENGINEER · AI SOLUTIONS

Paris, France (remote) · hello@dirtylab.fr · +33 6 linkedin.com/in/dirtyswift75 · dirtylab.fr · github.com/dirtyswift

■ SUMMARY

Engineer and technical project manager. 15 years at Cisco delivering web, mobile and cloud projects with international teams (Europe, India, US). Today I design, ship and deploy AI products and integrations through DirtyLab — agents, RAG, n8n automations, full-stack apps in production — directly inside client environments. I pair the delivery rigor of a large enterprise with the shipping speed of a builder: turning a messy business need into a tool that works. Open to fully remote.

■ SKILLS

DELIVERY & PM	Agile delivery (Scrum, Kanban) · roadmap & prioritization · scoping & specs · international team coordination · dev ↔ business ↔ leadership interface · stakeholder management & reporting
AI & AUTOMATION	LLMs (GPT, Claude, Llama) · AI agents · RAG · prompt engineering · n8n · Make · OpenAI / Anthropic integrations · no-code / low-code
ENGINEERING	Python · JavaScript / TypeScript · Node.js · React · Next.js · Java / J2EE · SQL
DATA & INFRA	Supabase · Airtable · MongoDB · Oracle · REST APIs · Docker · VPS · Git / GitHub
DOMAINS	Digital transformation · product prototyping / MVP · internal tooling · cloud & mobility · UX

■ EXPERIENCE

Founder & Creative Technologist

Sep 2023 → present

DirtyLab · Independent · Paris

AI product & integration studio: I scope, I build, I ship.

- Designed and shipped **full-stack web products** (Next.js, TypeScript, Supabase): SlotUp (B2B scheduling), VYBZ (vibe-based booking, AI recommendation), REQ (2-tap artist tipping, no app or account), BlindCV and WImfit.
- Embedded **AI into real workflows** — agents, RAG and automations with OpenAI, Claude and n8n.
- Delivered AI solutions **directly inside client environments (forward-deployed)** — process audits, n8n pipelines, Airtable / Make integrations for a law firm, an industrial SME and other businesses.
- Turned a paper field-audit form (industrial SME) into a **mobile-first application**: removed double data entry, structured the data.
- From scoping to production, solo or in a small team: specs, design, dev, deployment, iteration.

Stack — Next.js, TypeScript, React, Node.js, Python, Supabase, Claude, OpenAI, n8n, Make, Airtable

Senior Tech Project Manager & Software Engineer

Jan 1999 → Jan 2015

Cisco · Full-time · Paris

From developer to technical project manager, over 15 years.

- Led **web, mobile and cloud projects** in an international context; coordinated teams across **10+ countries**.
- Owned the **interface between development teams (India) and management (US)**: scoping, planning, technical oversight, cross-cultural communication, delivery quality.
- Designed and deployed **internal tools** to a large user base: cross-platform App Store (tools + security profiles), responsive Mobile Directory, PC Comparison Tool, myPTO redesign (leave management), onboarding interfaces (New Hire UX).
- Automated **recurring processes** to cut processing time and internal friction.

- Started an "Innovative Lab" (Node.js, MongoDB, Python) to prototype new internal use cases.

Stack — Java/J2EE, Web Services (XML/SOAP), Oracle, Tibco, HTML5/CSS3/JS, iOS (Swift/Objective-C), Node.js, Python

Host & Producer — Media & Content

2015 → 2023

Radio France (Mouv') · Paris

- Ran a **daily live production** on a national station: tight deadlines, execution under pressure, coordinating contributors.
- Designed and produced content formats; managed audience and digital presence.
- In parallel, continuous upskilling on web, mobile then AI — the foundation for the return to tech with DirtyLab.

■ **SELECTED PROJECTS**

SlotUp — B2B scheduling app. [Next.js](#) · [TypeScript](#) · [Supabase](#)

VYBZ — vibe-based booking, contextual AI recommendation. [Next.js](#) · [Claude](#) · [Supabase](#)

REQ — 2-tap artist tipping, no app or account. [Next.js](#) · [Supabase](#)

BlindCV · Wlmlfit — DirtyLab SaaS in production / iteration.

Field-audit app (industrial SME) — paper form → mobile-first application.

Internal App Store & Mobile Directory — internal tools deployed at scale. [Cisco](#)

■ **EDUCATION**

MSc-level — Mathematical Engineering & Computer Science

Université Paris Dauphine · 1995–1998

Classes Préparatoires (Math Sup / Math Spé)

Lycée Chateaubriand, Rennes · 1993–1996

French Scientific Baccalaureate, with honors

Rennes · 1993

■ **LANGUAGES**

French — native

English — fluent
